PURE**STONE**SOUL

STONEQUARTZ

Tra i materiali che negli ultimi tempi si sono diffusi maggiormente nell'applicazione per pavimentazione di aree esterne, la Quarzite ha un ruolo di assoluto rilievo. Una roccia composta soprattutto da quarzo ma al cui interno possono essere presenti anche altre tipologie di minerali che in diversa composizione ovviamente ne determinano anche il colore. Proprio per questo motivo la Quarzite non ha un colore uniforme ed è disponibile in una grande gamma differente di cromie e declinazione di tono.

La Quarzite è una pietra di rara bellezza sia al tatto che nelle caratteristiche fisiche meccaniche; viene estratta in una bacino unico al mondo, localizzato in Piemonte nella splendida cornice delle Alpi Cozie e più nota al mondo come la Bargiolina.

Il gres porcellanato colorato in massa STONEQUARTZ riproduce nelle sue 7 colorazioni diverse (Bianco, Beige, Perla, Sabbia, Grigio, Porfido e Nero) l'aspetto estetico e superficiale della quarzite, una superficie strutturata da "pietra a spacco", con caratteristiche funzionali superiori alla pietra stessa.

One material that has become very widespread for use in paving outdoor areas over recent years is Quartzite, which has now taken on a major role. This rock comprises mainly quartz, but inside it there may also be other types of minerals present, and these, in different compositions obviously also determine its colour. For this reason, Quartzite does not have a uniform colour and comes in a wide large range of different hues and colour-shades.

Quartzite is a stone of rare beauty, both to the touch and in its mechanical and physical properties; it is quarried in a basin that is unique in the world, located in Piedmont in the splendid setting of the Cozie Alps, and is better-known around the world as "La Bargiolina" quartzite.

STONEQUARTZ full-body-coloured porcelain tiles reproduce, in 7 different colourways (Bianco, Beige, Perla, Sabbia, Grigio, Porfido e Nero), the aesthetic, surface aspect of quartzite - a textured "split stone" surface - with higher functional characteristics than the stone itself.

Parmi les matériaux qui dernièrement ont connu la plus grande diffusion dans les applications pour revêtement de sol extérieur, la quartzite occupe une place de premier plan. Surtout composée de quartz, cette roche peut aussi renfermer d'autres types de minéraux qui, selon la composition, en déterminent la coloration. C'est pour cette raison que la quartzite n'a pas une coloration uniforme, et peut présenter une vaste gamme de couleurs et de déclinaisons de tons.

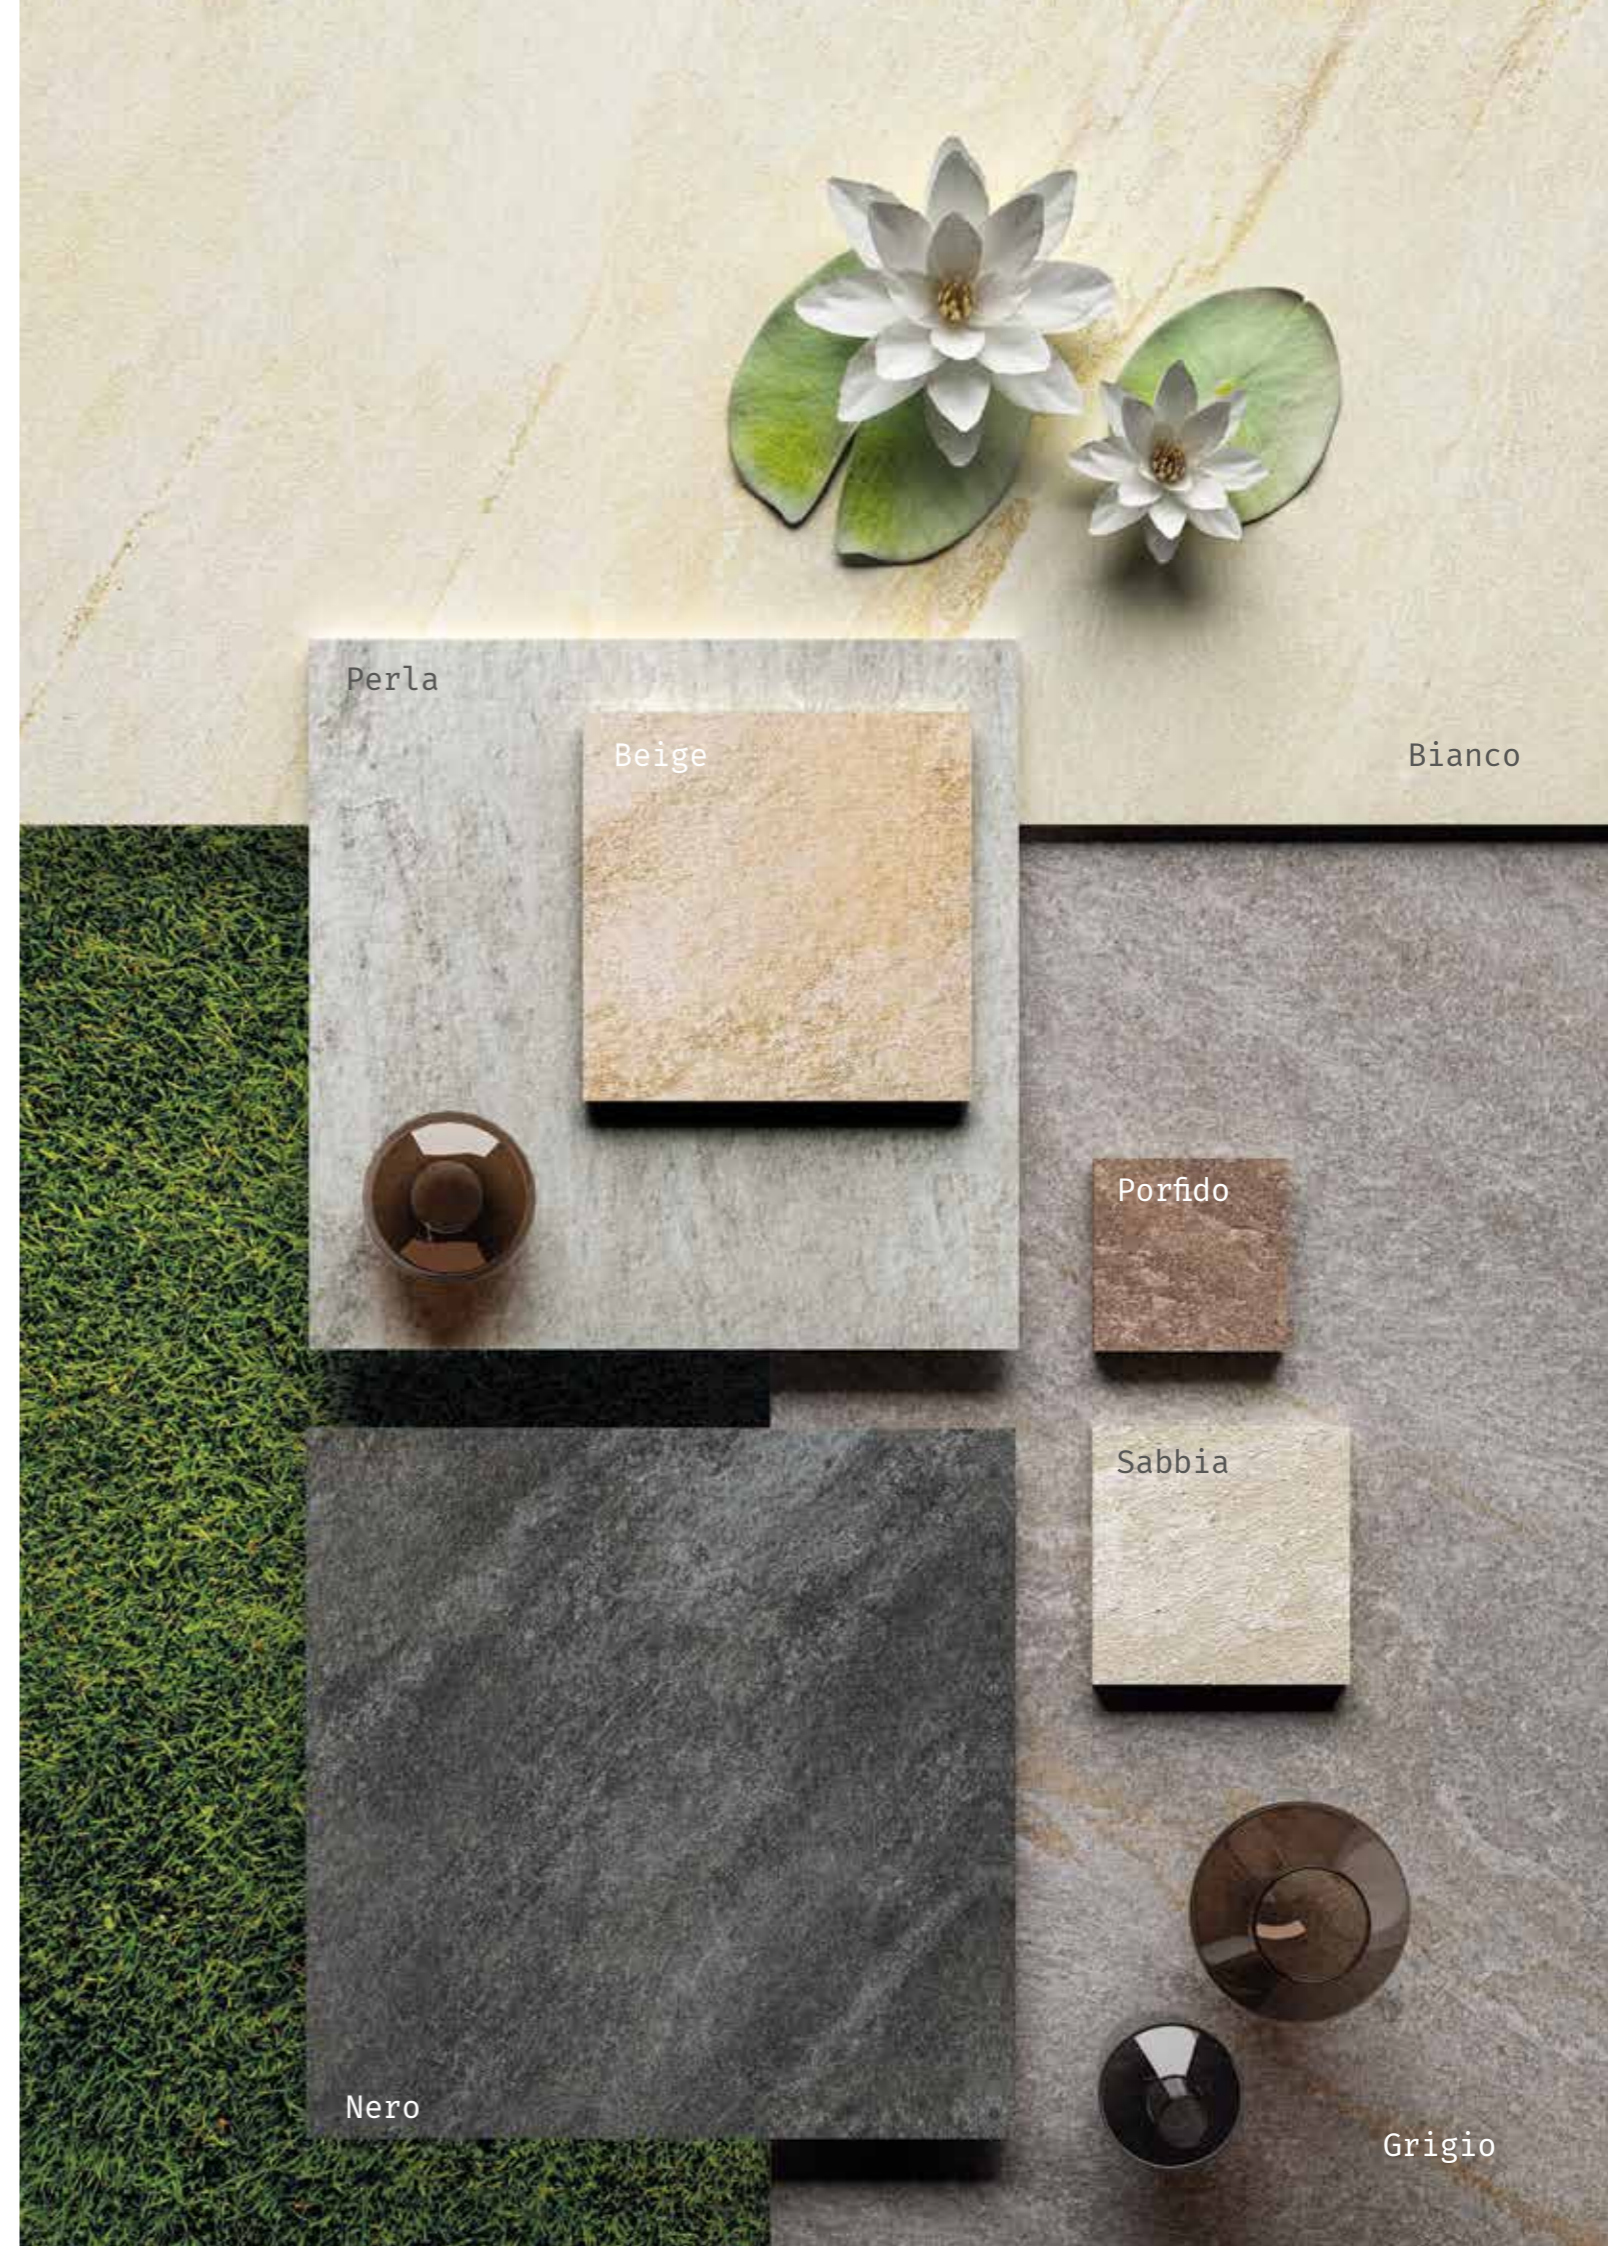

La Quartzite est une pierre d'une rare beauté, tant au toucher qu'à travers ses caractéristiques physiques et mécaniques. Elle est extraite d'un bassin unique en son genre situé au Piémont, dans le cadre splendide des Alpes cottiennes, région plus connue sous le nom de Bargiolina.

Le grès cérame STONEQUARTZ coloré pleine masse reproduit dans 7 colorations différentes (Bianco, Beige, Perla, Sabbia, Grigio, Porfido e Nero) l'aspect esthétique et superficiel de la quartzite, une surface structurée de type « pierre clivée », avec des caractéristiques fonctionnelles supérieures à la pierre elle-même.

Zu den Materialien, die in den letzten Jahren für Fußböden im Außenbereich immer beliebter werden, gehören an herausragender Stelle die Quarzite. Ein zur Hauptsache aus Quarz bestehender Stein, in dessen Innern sich aber auch anderen Arten von Mineralien befinden können, welche in ihrer unterschiedlichen Zusammensetzung natürlich auch den Farbton bestimmen. Aus ebendiesem Grund hat Quarzit nicht eine einheitliche Farbe und ist in einer breiten Palette von verschiedenen Farben und Nuancen erhältlich.

Quarzit ist ein Stein von seltener Schönheit, sowohl zum Anfassen wie auch aufgrund seiner physisch-mechanischen Eigenschaften; er wird in einem weltweit einzigartigen Becken im Piemont, in der herrlichen Umgebung der Kottischen Alpen, gewonnen und ist auch als Bargiolina-Stein bekannt.

Das durchgefärbte Steinzeug STONEQUARTZ reproduziert mit seinen 7 verschiedenen Farben (Bianco, Beige, Perla, Sabbia, Grigio, Porfido e Nero) Aussehen und "gespaltene" Oberflächenstruktur des Quarzits, mit Funktionsmerkmalen, die diejenige des Steins noch übertreffen.

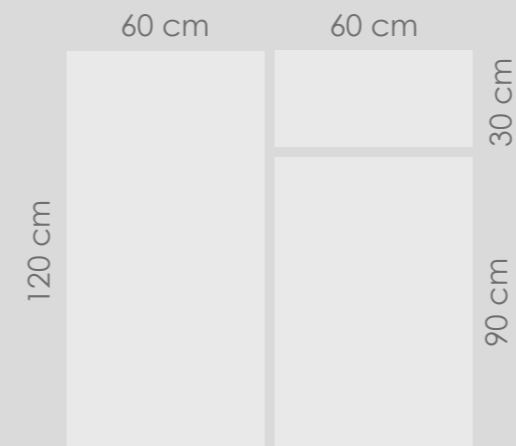

sistema modulare

Nuovo sistema modulare, appositamente studiato, che consente la realizzazione di pavimentazioni dagli inediti codici estetici. I moduli 30x60, 60x90, 60x120 dallo spessore di 9 mm sono contenuti in un unico packaging permettendo nuovi schemi di posa e garantendo molteplici risultati visivi.

New modular system with unique design allows the creation of floors with original aesthetic codes. The modules 30x60, 60x90, 60x120 with a thickness of 9mm are included in a single packaging in order to ensure several compositional opportunities.

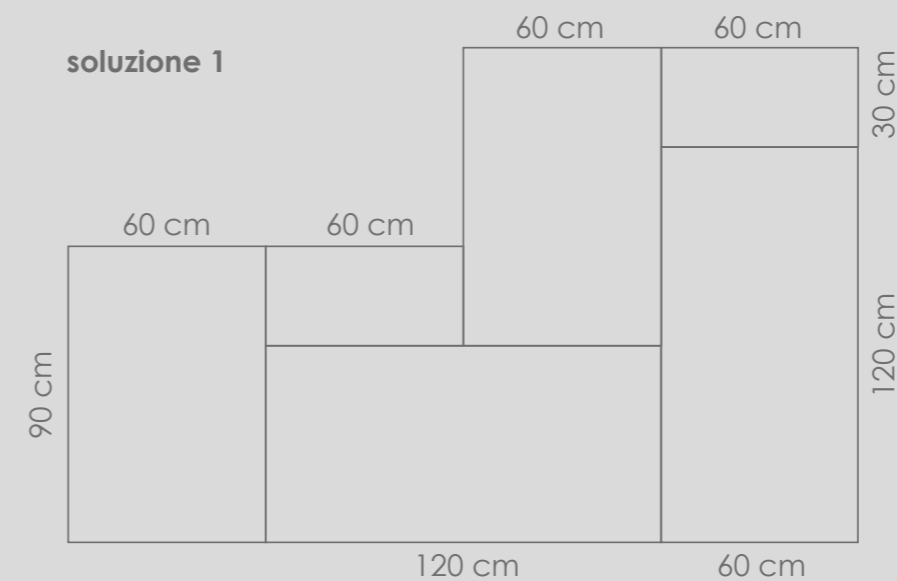

Nouveau système modulaire spécialement conçu, qui permet de réaliser des sols avec de nouveaux codes esthétiques. Les modules 30x60, 60x90, 60x120, de 9 mm d'épaisseur, sont contenus dans un seul emballage, en permettant de nouveaux schémas de pose et en garantissant de multiples résultats visuels.

Neues modulares System, das entwickelt wurde, um eine ganz spezielle Gestaltung von Böden mit brandneuen ästhetischen Merkmalen zu ermöglichen. Die 30x60, 60x90 und 60x120 großen und 9 mm dicken Module werden in einer einzigen Packung geliefert. Sie gestatten neue Verlegungspläne und garantieren zahlreiche visuelle Ergebnisse.
